

# Installing SSMS 2012 and BIDS

## Two EDW Power User Installs are listed below

- Both are free and available from Microsoft at the URLs listed below.
- We suggest downloading the packages from MS and storing them locally as MS is likely to change the package locations on their site.

## EDW Power User Installation 1

### SSMS 2012 (install management client only for running queries)

You can (and should) be able to safely upgrade your copy of SSMS to 2012 using the following steps:

1. Download the appropriate SQL Management Studio files from (<http://www.microsoft.com/en-us/download/details.aspx?id=35579>)
2. When prompted, download "SQLManagementStudio" as described in Microsoft's online documentation (snippets below)

Note: There are multiple files available for this download. Once you click on the "Download" button, you will be prompted to select the files you need.

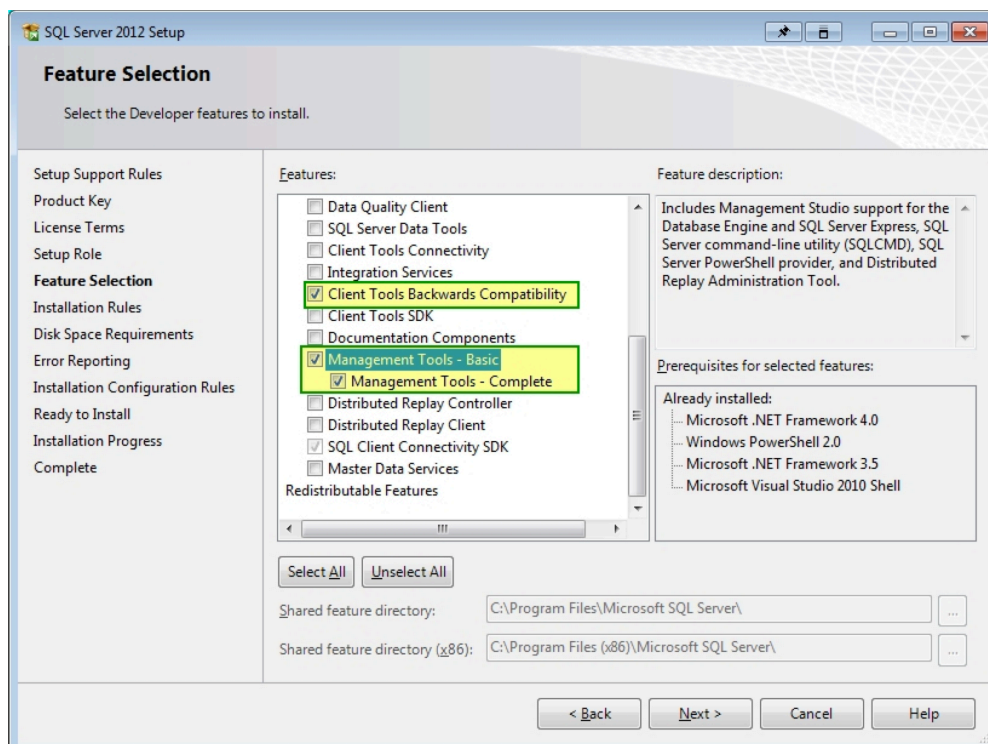

Version: Date Published:

-----  
11.0.3000.00 11/9/2012

File name: File size:

-----  
SQLManagementStudio\_x64\_ENU.exe 921.6 MB  
SQLManagementStudio\_x86\_ENU.exe 939.8 MB

SQL Server Management Studio Express (SQLManagementStudio) This does not contain the database, but only the tools to manage SQL Server instances, including LocalDB, SQL Express, SQL Azure, full version of SQL Server 2012 Management Studio with SP1, etc. Use this if you already have the database and only need the management tools.

## EDW Power User Installation 2

## **BIDS 2008R2 (for publishing reports)**

**From this site:** <http://www.microsoft.com/en-us/download/details.aspx?id=30438>

Download this file: SQLEXPADV\_x64\_ENU.exe

1,008.6 MB

And check **ONLY** the SQL Server Data Tools box (formerly known as Business Intelligence Development Studio)
